Hello,

The following submission has been created.

Track Name: RAAISA2026

Paper ID: 297

Paper Title: TutorLinkAI: A Verified Local Tutor Discovery and Booking Platform

Abstract:

In the fast-paced world, education plays a vital role in shaping the future of the younger generation. Many students find it difficult to keep up with their classes and compete academically with their peers. This creates a need for additional academic support for the students, leading to parents seeking tutors who can help their children understand the concepts where they require more assistance.

Parents often choose tutors who are close to their homes or tutors who have been suggested by relatives or neighbours; they miss out on checking if the tutor is the right fit for their child.

It is given that the parents want what is best for their child and help them academically, but they do not always perform background checks and assess whether this tutor is appropriate for the needs of their child and if they are properly qualified.

This often leads to the child not being able to understand the concepts despite the parents providing them with some help, but just not the right resources.

Another major problem that parents and students face is the lack of verification for the tutors. We must understand who is helping our children and assess if that person is legitimate and trustworthy. It is also important that we perform a credibility check rather than blindly believing the neighbors' or relatives' suggestions.

This is where TutorLinkAI comes in; the main goal of this application is to provide parents with the right information

to help provide the children with the right resources that help them academically without adding any strain.

TutorLinkAI focuses on connecting parents with the right tutors by assessing their qualifications and seeing if they can help in subjects where the child needs help.

Using TutorLinkAI, parents can check if the tutor is actually credible and has the appropriate degrees and credentials to help their children; this creates a sense of relief for both the children and the parents.
